

MYWEIGH BRIEFCASE BCS SERIES

The MyWeigh BCS-40 and BCS-80 BriefCase Series scales are portable & light industrial-bench "Briefcase Scales". These scales are extra-durable and designed for weight-checking, and all light industrial uses. They also make great shipping-scales. Their rugged, portable design has made them a proven winner in the fields of Geology, Refrigerant, Archeology, and more!

The ultra-portable design allows you to bring the scale to the item to be weighed - rather than bringing the item to be weighed to the scale: this is something to heavily consider since some items being weighed can be a hassle to move longer distances! The scale can also be removed from its case and installed as a regular shipping scale with the included AC Adaptor.

Briefcase Scale 176lb x 0.05lb / 88lb x 0.02lb Capacity
